To whom it may concern,

09, May 2021

Please accept this reference letter for Mr. Daniel Guild. He was employed as the Second Engineer for just over two years on Motor Yacht White Star. White Star is a private vessel permanently based in the Mediterranean with Caterpillar 33512B main engines, 99kw Kilopack generator x2, LOA 49.9m, gross tonnage 528GT and built by Trinity in 2004.

During Daniel's tenure, he was found to be proactive and a self-starter who is highly motivated, with exceptional learning capabilities, duty bound, a committed team player with strong conceptual knowledge to apply the necessary corrective measure(s) to whatever problems arise with all engineering aspect of the vessel. Daniel was fully switched-on and possessed great knowledge of the vessel's planned maintenance and inventory system.

He has proven to be efficient, punctual and hard working and has performed all assigned tasks satisfactorily. I highly recommend Daniel for any position he applies for.

Should you require any further information please feel free to contact me.

Aldrey Francis
Rotational Chief Engineer
